

# Serhii Danchuk

Front-end developer

## Professional Summary

Experienced Web Engineer with over 5 years of professional expertise in developing web solutions.

Demonstrated leadership skills as a Team Lead, successfully managing and mentoring development teams to deliver high-quality products.

Proficient in modern web technologies, including JavaScript, HTML, CSS, SCSS, ReactJS, and design implementation in Figma. Experienced in working with PHP, Docker, Webpack, and Git. Skilled in organizing workflows using Jira (Kanban and Scrum methodologies), effectively handling technical tasks, and maintaining smooth collaboration within the team.

Key responsibilities and achievements:

1. Building front-end functionality and entire projects from scratch.
2. Providing ongoing support for the codebase and resolving application defects.
3. Implementing new functionality and optimizing existing features.
4. Conducting precise estimations to ensure timely delivery of tasks.
5. Writing comprehensive technical documentation for projects.
6. Managing the full development cycle, from design conception to the implementation of user-friendly front-end solutions.

I bring a strong technical foundation, effective communication skills, and a passion for delivering impactful web solutions while fostering teamwork and innovation within the development process.
